

C1000

Product Name: UHF Antenna Splitter

DESCRIPTION: It is designed to great improve RF performance by reducing the chance of signal lost. It also share the RF signal to four units of the True Diversity Receiver, the chance for dropouts cause by multi-path interference while keeping stage clutter to a minimum.

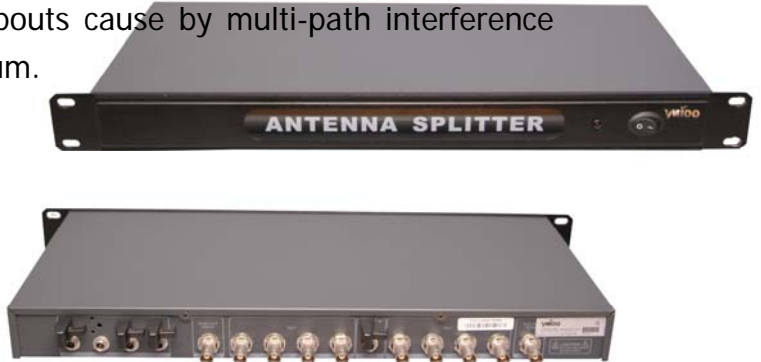

Antenna Power Output: DC12-18V

Frequency Range: 470-870MHz

RF Gain: 0.5 to 3dB

Output Impedance: 50Ω

Size: 1U standard

C1100

Product Name: Mini UHF Antenna Amplifier

DESCRIPTION: Improves RF signal gain by 10dB or more includes 300mm coaxial cable.

Antenna Power In: DC12-18V

RF Gain: 10dBi

Size: 70 x 25 x25mm

C1200

Product Name: Unidirectional UHF Antenna

DESCRIPTION: Wideband design (470 -870MHz) for use with all wireless microphone frequency groups. Improves RF signal gain by 10dB or more.

Antenna Power In: DC12-18V

RF Gain: 10dBi

Size: 320 x 340mm
