

AUDIO-VISUAL STATION

AVS Audio Isolator

MODEL : ISR-22

This module is designed for high performance line output stages. That is used for lowest possible harmonic distortion of high level low frequency signals. For best performance, driving signals should be free of DC and source impedance kept as low as possible.

Specification:

Input impedance: 600Ω : 600Ω

Frequency response: 20 to 20KHz $\pm 3\text{dB}$

Common-mode rejection ratio (CMRR): 3KHz 85dB

Size: 80 x 68 x 28mm

* Weight and dimensions are for reference data only
