T7

Infrared headworn microphone transmitter

T7 is designed as a 100% hands-free movement infrared microphone. The idea of diminishing corded distraction helps you to escape from the dilemma when you like to sing and perform simultaneously. Collocated with Linkx specially designed microphone capsule, T7 creates superior sound clarity and quality by effectively reducing ambient sound, suppressing feedback and improving the effective dynamic range.

T7 bring outstanding 360 degree full angle emitting coverage and 6 hours continuous operation, a very unique microphone with sufficient stability of wireless transmission for classroom and Karaoke house application.

Features

- ▣ Adopt built-in Rechargeable 1300mA Lithium Polymer battery
- ▣ Up to 6 hours of uninterrupted use when fully charged
- ▣ Convenient micro USB universal standard charging method
- ▣ Channel selectable
- ▣ 360 degree emitting angle increases link range, reliability and stability
- ▣ Lightweight headband and soft support pads provide solid and comfortable fit

Specification

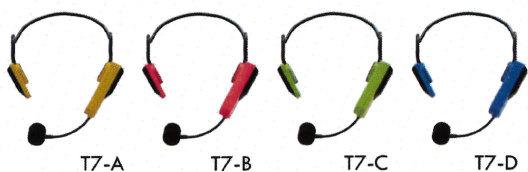

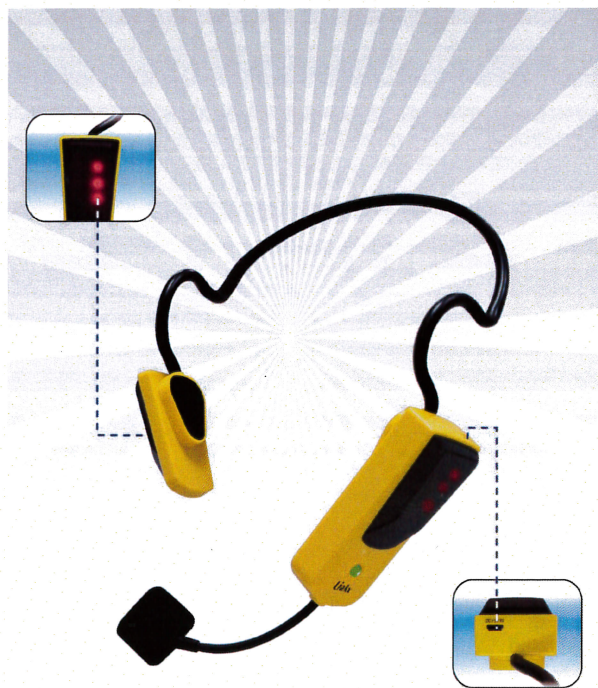

Type	Headset
Infrared Ray Wavelength	850 nm
Transmission Frequency	T7-A : 2.08 MHz (Yellow) / T7-B : 2.54 MHz (Red) T7-C : 2.3 MHz (Green) / T7-D : 2.8 MHz (Blue)
Modulation	FM
Pilotone Frequency	32.768KHz
Transmission Angle	360°, Conical
Microphone Capsule	Condenser, directional
Location of IR Emitter	IR emitter diodes on both sides
Current Consumption	170mA
Battery	Li-Polymer Battery (3.7V / 1300mAh)
Operating time	Approx. 6 hours
Power LED Indicator	Battery capacity : Full to Low (Green -> Orange -> Red) Charging : Red Charging complete : Green
External Power Supply	DC 5V, Micro USB connector
Weight	Approx. 85 g (with Battery)

Accessories

USB to MicroUSB cable

USB power adaptor
